BEDDING

Classic 10 kg

Available in DENMARK

2-5 mm bedding. 10 kg autoclavable bag. 36 bags/pallet.

Dust-free, high absorbent Aspen wood bedding made of debarked chopped. Sifted and dried at high temperature (120-130°C) which guarantees effective reduction of bacteria. Autoclavable; physical properties are not altered by the process, no clumping.

Midi 10 kg

Available in DENMARK

2-3 mm bedding. 10 kg autoclavable bag. 36 bags/pallet.

Dust-free, high absorbent Aspen wood bedding made of debarked chopped. Sifted and dried at high temperature (120-130°C) which guarantees effective reduction of bacteria. Autoclavable; physical properties are not altered by the process, no clumping.

Mini 10 kg

Available in DENMARK

1-2 mm bedding. 10 kg autoclavable bag. 36 bags/pallet.

Dust-free, high absorbent Aspen wood bedding made of debarked chopped. Sifted and dried at high temperature (120-130°C) which guarantees effective reduction of bacteria. Autoclavable; physical properties are not altered by the process, no clumping.

Mini 10 kg Irradiated

Available in DENMARK

1-2 mm bedding. 10 kg autoclavable bag. 36 bags/pallet.

Dust-free, high absorbent Aspen wood bedding made of debarked chopped. Sifted and dried at high temperature (120-130°C) which guarantees effective reduction of bacteria. Autoclavable; physical properties are not altered by the process, no clumping.

Classic Big Bag

Available in DENMARK

2-5 mm bedding. 270 kg Big Bag.

Dust-free, high absorbent Aspen wood bedding made of debarked chopped. Sifted and dried at high temperature (120-130°C) which guarantees effective reduction of bacteria. Autoclavable; physical properties are not altered by the process, no clumping.

Midi Big Bag

Available in DENMARK

2-3 mm bedding. 270 kg Big Bag.

Dust-free, high absorbent Aspen wood bedding made of debarked chopped. Sifted and dried at high temperature (120-130°C) which guarantees effective reduction of bacteria. Autoclavable; physical properties are not altered by the process, no clumping.

Tapvei 10 kg

Available in NORWAY AND SWEDEN

5x5x1 mm bedding. 10 kg paper bag. 33 bags/pallet.

Aspen, moisture content around 10%, relative density 180-200 kg/m³, absorbing capacity 260%, dust content (particles < 0.25mm), less than 0.1%, binding of ammonium 26mg/L. Ideal for use within automated bedding dispensers, recommended for IVC, isolators and automated systems. Autoclavable, biodegradable, full batch analysis, dried using only 100% renewable bioenergy, safe for animal and human respiratory tracts, rapid on-time deliveries.

Tapvei Big Bag

Available in NORWAY AND SWEDEN

5x5x1 mm bedding. 175 kg big bag.

Aspen, moisture content around 10%, relative density 180-200 kg/m³, absorbing capacity 260%, dust content (particles < 0.25mm), less than 0.1%, binding of ammonium 26mg/L. Ideal for use within automated bedding dispensers, recommended for IVC, isolators and automated systems. Autoclavable, biodegradable, full batch analysis, dried using only 100% renewable bioenergy, safe for animal and human respiratory tracts, rapid on-time deliveries.

BEDDING

Datesand Nestpak

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Nestpak; patented 3-in-1 bedding, nesting and enrichment. Produced from European Poplar, ABP3 is an excellent alternative to premium Aspen, offering very similar properties at a more economical price point. Delivers a precise and consistent amount of substrate and utilise animals natural instincts to shred and forage to build nests. The animals get to shred through quality FDA paper and forage 600ml of Poplar bedding allowing them to nest. Ideal for rodents, circulates well avoiding clots, suitable for all cage types, all species, reduces cage change, minimises animal stress, conforms to GLP standards, 910ml/g absorption capacity, virtually dust free, moisture content <16%, autoclavable, IVC cage compatible.

Datesand Pure-o'Cel

Available in DENMARK, SWEDEN, NORWAY, FINLAND

10 kg bag.

Highly absorbing, dust-free cellulose bedding. Pure-o'Cel allows for higher absorbency with less bedding. Large square size provides 75% more surface area than competitive squares. Avoids clogging. These soft squares allow for less in cage dust from animal movements and friction, ideal for nude/hairless mice. Each bag of Pure-o'Cel provides a consistent number of cage fills every time, simplifying inventory management. Animal discharge is instantly noticed on the virgin white paper allowing for quick health checks. Available as a bedding/enrichment blend.

GNAWING BLOCKS

Aspen Gnawing Bricks/Chew Block Small

Available in DENMARK, SWEDEN, NORWAY, FINLAND

1500/box.

Aspen bricks for mice.

Aspen Gnawing Bricks/Chew Block Medium

Available in DENMARK, SWEDEN, NORWAY, FINLAND

260 per box.

Aspen bricks for rats.

HANDLING

Datesand Clear Handling Tunnel

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Boxes of 100 pcs.

Research has shown that picking up mice by the tail induces aversion and high anxiety and generally should be avoided. Mice are quick to habituate to tunnel handling, and the experience becomes much less stressful for both animal and handler. Made from 3 mm thick clear polycarbonate, high-grade Polycarbonate, injection moulded for smooth edges, 50 mm inside diameter, reduces handling anxiety and stress, makes animal observations easier, reduces the risk of being bitten, minimal physical contact required, autoclavable at 121°C, cagewasher safe.

Datesand ScruffGuard Reusable

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Pack of 25 pcs.

With the ScruffGuard you can handle and dose small animals gently, whilst avoiding bites and needlestick injuries. It can also be an essential learning device when trainees are learning how to handle small animals. Available in reusable and disposable varieties, ScruffGuard can be used to administer substances subcutaneously, as well as intraperitoneal and intramuscular routes. It can be highly useful when implanting microchips. Made from autoclavable Nylon, quality assured, available in multiple sizes to suit weaners to obese mice, autoclave at max. 121°C.

Datesand ScruffGuard Disposable

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Pack of 25 pcs.

With the ScruffGuard you can handle and dose small animals gently, whilst avoiding bites and needlestick injuries. It can also be an essential learning device when trainees are learning how to handle small animals. Available in reusable and disposable varieties, ScruffGuard can be used to administer substances subcutaneously, as well as intraperitoneal and intramuscular routes. It can be highly useful when implanting microchips. Made from Made from disposable sugar cane, quality assured, autoclave at 121°C.

Datesand Sizzle Nest

Available in DENMARK, SWEDEN, NORWAY, FINLAND

12 boxes per pallet.

Sizzle Nest, a high-quality, dust-free nesting material that is suitable for any caged or penned animals. Designed to resemble materials rodents instinctively use to nest, Sizzle Nest is light and springy enough to build the cosiest of nests. Biodegradable, made from 100% recycled paper pulp.

Datesand Paper Wool

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Once they have the ideal layer of substrate, your animals need a comfortable nesting material. Small mammals love their creature comforts almost as much as they love to dig, forage and investigate. Why not provide them with a nesting material that caters to both? This soft textured Paper Wool offers a clean, comfortable and absorbent solution. Combining a high level of warmth and comfort with superb cleanliness and disposability, Paper Wool gives your curious rodents an excellent source of foraging and nesting material.

Datesand Paper Shavings

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Once they have the ideal layer of substrate, your animals need a comfortable nesting material. Small mammals love their creature comforts almost as much as they love to dig, forage and investigate. Why not provide them with a nesting material that caters to both? These soft textured Paper Shavings offers a clean, comfortable and absorbent solution. Combining a high level of warmth and comfort with superb cleanliness and disposability, Paper Shavings gives your curious rodents an excellent source of foraging and nesting material.

Datesand Bed-r'Nest

Available in DENMARK, SWEDEN, NORWAY, FINLAND

1 box contains 800 Bed-r'Nest pucks.

Bed-r'Nest provides a consistent amount of virtually dust-free nesting material to every cage, every time. Each ready-to-use puck provides an 8-gram portion, the perfect, industry recommended amount of comfortable bedding. The easy-to-dispense portion controlled pucks eliminate the difficulties associated with handling and portioning of bulk nesting material, as well as offering a predictable cost per cage every time.

NESTING

Datesand Nestlets

Available in DENMARK, SWEDEN, NORWAY, FINLAND

1 box contains 3600 Nestlets.

Nestlets are a great source of nesting material for mice, rats, rabbits and other small animals. They are made of clean, dust-free and autoclavable pulped virgin cotton fibre and are designed to retain warmth. Nestlets offer an economical nesting solution, offering considerable cost savings in labour, storage and disposal.

Ssniff ECO-Hemp

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Pads of 39 x 39 x 5 mm. 35 pads/sheet and 50 sheets per box. 1750 pads per box.

Nesting material and enrichment product for rodents. ECO-Hemp is made from organic cultivated hemp, a material from natural environment of rodents. The product is GLP compliant (free from contaminants, 100% traceability). Soft, virtually dust free, ideal for IVC's, from organic hemp, no pesticide residues, time and cost saving.

Datesand Cocoon

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Designed to encourage your animals to forage, carry and shred to their hearts content to create a nest that is warm, soft and perfect for adults and pups alike. A small, cylindrical, lightweight form allows the animals to transport it around their environment with ease. They are made from safe, short fibres which are tightly packed to encourage rodents to rip, shed and pull apart the material, just as they would in a natural habitat. The short fibres are completely safe for rodents and pups. They remain soft to the touch and trap the animals body heat to create a warm environment and aid thermoregulation. Natural nesting, satisfy animals' natural instincts to shred material for nests, whitened without chlorine, full certification available, can be supplied irradiated.

Datesand Enrich-n-Nest

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Nesting material made from pure white paper rolls, encourages animals to scavenge and unfurl the paper to create their own nests. Produced in FDA certified facilities, with full traceability and certification to comply with GLP standards. Dust free, does not clog air filters, suitable for nude and hairless mice, clean, white twist provides improved observation, completely biodegradable, available combined with Bed-o'Cobs or Pure-o'Cel.

Datesand Enviro Pak

Available in DENMARK, SWEDEN, NORWAY, FINLAND

1 box contains 600 EnviroPaks

The EnviroPak has the unique combination of our highly acclaimed Nestpaks along with a precise dose of top-quality nesting material. It is the perfect solution for animal nesting and enrichment in one easy-to-use pack. The revolutionary EnviroPak will save you time and effort, providing precise and comprehensive nesting and enrichment for your animals.

Datesand Nestpak

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Nestpak; patented 3-in-1 bedding, nesting and enrichment. Produced from European Poplar, ABP3 is an excellent alternative to premium Aspen, offering very similar properties at a more economical price point. Delivers a precise and consistent amount of substrate and utilise animals natural instincts to shred and forage to build nests. The animals get to shred through quality FDA paper and forage 600ml of Poplar bedding allowing them to nest. Ideal for rodents, circulates well avoiding clots, suitable for all cage types, all species, reduces cage change, minimises animal stress, conforms to GLP standards, 910ml/g absorption capacity, virtually dust free, moisture content <16%, autoclavable, IVC cage compatible.

ENRICHMENT DISPOSABLE

Datesand Smart Home

Available in DENMARK, SWEDEN, NORWAY, FINLAND

1 box contains 500 Smart Homes.

Rodent home, excellent shelter and enrichment, GLP compliant, batch coded with full traceability/certificate of analysis, excellent for tox or short term studies. Can be split into 2 smaller houses, autoclavable, can be supplied irradiated. Biodegradable, made from 100% recycled paper pulp.

Datesand Rat Corner Homes

Available in DENMARK, SWEDEN, NORWAY, FINLAND

1 box contains 200 Rat Corner Homes.

Rodent home, excellent shelter and enrichment, GLP compliant, batch coded with full traceability/certificate of analysis, excellent for tox or short term studies, can be split into 2 smaller houses, autoclavable, can be supplied irradiated. Biodegradable, made from 100% recycled paper pulp.

Datesand Play Tunnels

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Long lasting, high quality play tunnel enrichment can be produced in a wide range of lengths, widths and thicknesses to suit all manner of different species and activities. Autoclavable, can be supplied irradiated. Biodegradable, made from 100% recycled paper pulp.

Datesand Ecodish

Available in DENMARK, SWEDEN, NORWAY, FINLAND

A groundbreaking solution that prioritises environmental sustainability and streamlines your laboratory workflow. Bid farewell to traditional plastic dishes and embrace efficiency with this innovative alternative. Reduce environmental impact with this recyclable and biodegradable product. Maintains the same reliability and functionality as conventional petri dishes. Often significantly lower cost than conventional petri dish. Biodegradable, made from 100% recycled paper pulp.

Datesand Mouse and Rat Tunnel Red

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Providing rodents with a safe refuge is vital to their wellbeing and promoting positive behaviours. The rodent tunnels offer a secure, sheltered hiding place without adversely affecting the visibility of carers carrying out cage checks. These tunnels can also be useful as a handling device, offering a simple way to separate an individual in multi-animal environments. Rodent tunnels are tinted in a choice of red or amber, providing a sense of sanctuary by reducing the level of perceived light. Autoclavable and cagewasher safe.

Datesand Clear Handling Tunnel

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Box of 100 pcs.

Research has shown that picking up mice by the tail induces aversion and high anxiety and generally should be avoided. Mice are quick to habituate to tunnel handling, and the experience becomes much less stressful for both animal and handler. Made from 3 mm thick clear polycarbonate, high-grade Polycarbonate, injection moulded for smooth edges, 50 mm inside diameter, reduces handling anxiety and stress, makes animal observations easier, reduces the risk of being bitten, minimal physical contact required, autoclavable at 121°C, cagewasher safe.

Datesand Tunnel Clip

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Made from durable polycarbonate, suspend play tunnels from the cage lid creates more cage space, improving enrichment and overall animal welfare. Available in 2 sizes to fit a multitude of tunnel designs, also available in a new, bi-directional design. This allows you to suspend tunnels along the length and width of the cage. The large tunnel clip has been designed to fit a medium sized tunnel, red polycarbonate tunnel or clear handling tube.

Datesand Mouse Swing

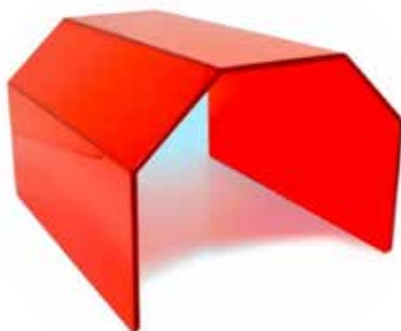

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Pack of 100.

The Mouse Swing is pure genius in its simplicity. It can easily clip onto the bars of most cages, increasing the use of the 3-dimensional cage space and encouraging climbing – a natural behaviour for mice. It is well-known that by promoting the natural behaviour of these animals, stereotypical behaviour can be better prevented. Encourages climbing and hanging, creates a refuge when used with a Play Tunnel, easy clip-on design, cost-effective, cagewasher safe, autoclavable, made from nylon.

ENRICHMENT REUSABLE

Datesand Guinea Pig Shelter

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Polycarbonate shelter offer your animals a safe, versatile space they crave, enriching their lives and boosting their social relationships with other animals. Made from high temp polycarbonate, transparent enough to make routine cage checks fast and easy, tinted red to bring your animals that sense of shelter by reducing the level of perceived light. Fully contaminant screened, the flat top allows for increased floor space and a raised vantage point whilst its firm sides prevent rolling. The open bottom prevents the build-up of urine and stacks easily when kept in storage. Your animals can gnaw, climb, shelter and hide to their hearts content. Also suitable for use within aquatic environments. Autoclavable, cage washer safe.

Datesand Mouse Mezzanine

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Manufactured in a sturdy red polycarbonate, the simple yet effective design fits nicely into the cage without restricting access to food and water supplies. The product offers a wide variety of space, activity and shelter to enhance the wellbeing of your animals. Two levels increasing cage space and complexity. Provides a refuge in case of cage flooding, made from high-quality red polycarbonate, autoclavable red polycarbonate, cagewasher safe.

Datesand C-Saw

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Boxes of 25 (excl tunnels).

Made with certified, hard-wearing N6 Nylon, the C-Saw is an innovative enrichment device specifically designed to encourage group play, exercise and improve balance in small rodents. The C-Saw is designed to be used with a standard disposable play tunnel meaning that mice will get two enrichment devices in one, freeing up cage space and promoting wellbeing. Provides variable exercise and shelter, increases sensory balance awareness, cagewasher safe, autoclavable, easy slide-on design, made from certified Nylon.

Datesand Lily pad

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Box of 100 Lily pads

Provides shelter and engagement for your aquatic environments. Made from polypropylene to float on the water's surface, the Lily pad mimics the floating plants and leaves of a natural aquatic environment. The Lily pad also offers a place to shelter and hide, reducing stress and helping to improve breeding behaviours and psychological welfare Premium polypropylene, autoclavable, minimises animal stress levels, promotes natural behaviours, mimics natural environment, provides shelter, full batch analysis.

Datesand Mouse Tent

Available in DENMARK, SWEDEN, NORWAY, FINLAND

The Mouse Tent is made from tinted transparent polycarbonate and provides an ideal shelter for mothers to build their nests, whilst allowing good visibility for cage checks. Its unique design increases the floor area and offers life-saving refuge during cage flooding events by providing an opportunity for escape to a higher level where mice can stay warm and dry. Increase cage floor area, autoclavable red polycarbonate, cagewasher safe, excellent quality yet highly economical, easy to clean, store and stack. Floor area: 130 x 130 mm. Height: 38 mm.

Datesand Nombroero

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Pack of 10.

Suspended from the cage top, the Nombroero allows you to deliver wet diet, pellets and even nesting material whilst taking up no floor space. The hanging design satisfies your animals instinct to climb and forage for resources, whilst also preventing tipping, spillages and food contamination. By eliminating contact between the cage base and food receptacle, the Nombroero not only stops bedding substrate from soiling foodstuffs, it can also reduce the costs associated with continually replacing wet bedding. Reusable and easy to clean, the Nombroero has a stackable design perfect for storage and postage. Clean and accessible wet diet delivery, improve and refine welfare standards, reduce costs from wet bedding replacement, creates addition mobile platform/refuge, made from strong N6 Nylon, autoclavable, stackable design.

Datesand Mouse and Rat Tunnel Red

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Providing rodents with a safe refuge is vital to their wellbeing and promoting positive behaviours. The rodent tunnels offer a secure, sheltered hiding place without adversely affecting the visibility of carers carrying out cage checks. These tunnels can also be useful as a handling device, offering a simple way to separate an individual in multi-animal environments. Rodent tunnels are tinted in a choice of red or amber, providing a sense of sanctuary by reducing the level of perceived light. Autoclavable and cagewasher safe.

ENRICHMENT EC4RATS

SCANBUR Rat Cave

Available in WORLDWIDE

Designed to enhance animal welfare in your housing systems, this product provides an optimal solution for shelter while simultaneously stimulating exploratory behavior, play, nesting, and climbing. It offers a flexible solution as both a shelter and play area and can be used in multiple ways, accommodating a wide range of housing systems. For females with pups, it is recommended to use the cave assembled, allowing for cage changes with minimal disturbance to the pups, as the nest can be moved in its entirety inside the cave. It features multiple entry and exit points and can be used either assembled or split into two. The top is made from 3 mm red transparent polycarbonate for easy visibility, and the bottom is made from 3 mm grey polycarbonate. It is injection-molded, autoclavable, and cage washer safe. Dimensions: W226 x H143 mm.

SCANBUR Rat Chew Blocks

Available in WORLDWIDE

Aspen chew blocks on a spear with a hook for rodents. The spear is made of stainless steel, autoclavable, and cage washer safe. Dimensions: H171 mm (without hook)/H287 mm (with hook).

SCANBUR Rat Tunnel

Available in WORLDWIDE

Providing rodents with a safe refuge is vital to their well-being and promotes positive behaviors. This tunnel offers a secure, sheltered hiding place. It is made from 3 mm clear transparent polycarbonate for easy visibility, injection-molded, autoclavable, and cage washer safe. Dimensions: Ø110 x L250 mm.

Ssniff Hay Blocks

Available in DENMARK, SWEDEN, NORWAY, FINLAND

15 kg box.

This supplementary feed consists only of long meadow hay cuts. It is intended as an additional fibre source and as enrichment for the maintenance of guinea pigs and rabbits. It is an excellent source of chewable fibre which is essential for the digestive system of all herbivorous species. Furthermore, free access to hay (or other coarse feed) helps to prevent overgrowth of the teeth. The hay block can be fixed in a special designed rack.

Ssniff Hay Cobs

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Ø15 mm, 15 kg bag.

The hay cobs mainly consist of meadow hay. It is intended as an additional fibre source and as enrichment for the maintenance of rabbits and guinea pigs. The hay cobs is a natural product which may vary in the crude nutrient and mineral contents.

Ssniff Hay, long -irradiated

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Sterilized 18 kGy. 4 kg bag, 40 bags per pallet.

The meadow hay is a coarse feed consisting of different grasses and herbs which have been gently dried after harvest. It is an excellent source of chewable fibre which is essential for the digestive system of all herbivorous species. Furthermore, free access to hay (or other coarse feed) helps prevent overgrowth of teeth. The hay is a natural product that may vary in the crude nutrient and mineral content.

Ssniff Straw, long -irradiated

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Sterilized 18 kGy. 2.5 kg bag, 60 bags per pallet.

The ssniff straw can be used as bedding material and as supplementary coarse feed. It is an excellent source of chewable fibre which is essential for the digestive system of all herbivorous species. The straw is regularly tested for the nutrient contents and contaminants, a natural product that may vary in the nutrient contents.

DIETS STANDARD

Ssniff Mouse Breeding Diet

Available in DENMARK, SWEDEN, NORWAY, FINLAND

10 kg bag. 78 bags per pallet. 10 mm pellets.

Complete feed for mice and rats. This diet has been designed for breeding of mice; it can also be used for rats. The dietary nutrient contents and the energy density are adjusted to the high performance during reproduction to meet the increased nutrient requirements. Dietary composition: Wheat and wheat products, soybean products, corn (maize), minerals, soybean oil, brewer's yeast, vitamins & trace elements, L-lysine HCl, DH-methionine.

Ssniff Mouse Breeding Extrudate Diet

Available in DENMARK, SWEDEN, NORWAY, FINLAND

10 kg bag. 45 bags per pallet. Ø 16 mm extrudates.

Complete feed for mice and rats. This diet has been designed for breeding of mice and rats. The dietary protein content and quality (amino acid composition) as well as the energy density are adjusted to the high performance during reproduction. Moreover, the digestibility and palatability of the diet are improved by the extrusion process. Dietary composition: Wheat, soybean products, corn (maize) products, oat middlings, minerals, soybean oil, sugar beet pulp, vitamins & trace elements, L-lysine HCl, DH-methionine.

Ssniff Autoclavable Mouse Breeding Diet

Available in DENMARK, SWEDEN, NORWAY, FINLAND

10 kg bag. 78 bags per pallet. Autoclavable 10 mm pellets.

Complete feed for mice and rats. This diet has been designed for breeding of mice; it can also be used for rats. The dietary nutrient contents and the energy density are adjusted to the high performance during reproduction to meet the increased nutrient requirements. This diet is fortified for sterilization processes. Dietary composition: Wheat and wheat products, soybean products, corn (maize), minerals, soybean oil, brewer's yeast, vitamins & trace elements, L-lysine HCl, DH-methionine.

Ssniff Mouse Breeding Low Phytoestrogen

Available in DENMARK, SWEDEN, NORWAY, FINLAND

10 kg bag. 78 bags per pallet. 10 mm pellets.

Complete feed for mice and rats. Without soybean and alfalfa products. Designed for breeding of mice (it can also be used for rats), and is therefore characterized by high protein and energy contents. The feed contains no soyabean or alfalfa products resulting in very low concentrations (traces) of the phytoestrogens genistein, daidzein and coumestrol which make this diet suitable for studies on the effect of oestrogens and similar substances (endogen disrupters). Dietary composition: Wheat and wheat products, barley, corn gluten, sunflower meal, potato protein, minerals, brewer's yeast, vitamins & trace elements, vegetable oil, L-lysine HCl, DH-methionine.

Ssniff Rat/Mouse Maintenance Diet

Available in DENMARK, SWEDEN, NORWAY, FINLAND

10 kg bag. 78 bags per pallet. 10 mm pellets.

Complete feed for mice and rats. This diet has been designed for rat and mice and is suitable for long term experiments (e.g. chronic toxicity studies), because of the moderate energy density and the very low nitrosamine contents. Dietary composition: Wheat and wheat products, soybean products, barley, minerals, oat hulls, sugar beet pulp, vitamins & trace elements, L-lysine HCl, DH-methionine.

Ssniff Rat/Mouse Maintenance Extrudate

Available in DENMARK, SWEDEN, NORWAY, FINLAND

10 kg bag. 45 bags per pallet. Ø16 mm extrudate pellets.

Complete feed for mice and rats. This diet has been designed for rat and mice and is suitable for long term experiments (e.g. chronic toxicity studies), because of the moderate energy density and the very low nitrosamine contents. Moreover, the diet is highly digestible and palatable due to the extrusion process. Dietary composition: Wheat and wheat products, corn (maize) & corn products, soybean products, oat bran and middlings, sugar beet pulp, mineralts, vitamins & trace elements, soybean oil, L-lysine HCl, DH-methionine.

Ssniff Autoclavable Rat/Mouse Maintenance

Available in DENMARK, SWEDEN, NORWAY, FINLAND

10 kg bag. 78 bags per pallet. Autoclavable 10 mm pellets.

Complete feed for mice and rats. This diet has been designed for rat and mice and is suitable for long term experiments (e.g. chronic toxicity studies), because of the moderate energy density and the very low nitrosamine contents. The diet is vitamin and amino acid fortified to compensate for the nutrient losses during the sterilization process. Dietary composition: Wheat and wheat products, soybean products, barley, minerals, oat hulls, sugar beet pulp, vitamins & trace elements, L-lysine HCl, DH-methionine.

Ssniff Rat/Mouse Maintenance Low Phytoestrogen

Available in DENMARK, SWEDEN, NORWAY, FINLAND

10 kg bag. 78 bags per pallet. 10 mm pellets.

Complete feed for mice and rats. 'Without soybean and alfalfa products. This maintenance diet for rats and mice contains no soybean or alfalfa products and contains accordingly only traces of the of the phytoestrogens genistein, daidzein and coumestrol. This diet is therefore suitable for studies on the effect of estrogens and similar substances (endogen disrupters). Dietary composition: Wheat and wheat products, barley, corn gluten, potato protein, minerals, oat hulls, vitamins & trace elements, vegetable oil, L-lysine HCl, DH-methionine.

DIETS STANDARD

Ssniff Rabbit Breeding Diet

Available in DENMARK, SWEDEN, NORWAY, FINLAND

10 kg bag. 78 bags per pallet. 4 mm pellets.

This diet has been designed as a complete feed for breeding rabbits. The protein content and energy density are adjusted to the high requirements during this stage of life. The fibre content and the portion of effective (chewable) fibre will support the physiological gut function. Dietary composition: Alfalfa meal, wheat and wheat products, barley, soybean products, corn gluten feed, sunflower seeds, sugar beet pulp, minerals, vitamins and trace elements, soybean oil, L-lysine HCl, DL-methionine.

Ssniff Rabbit Maintenance Diet

Available in DENMARK, SWEDEN, NORWAY, FINLAND

10 kg bag. 78 bags per pallet. 4 mm pellets.

This diet has been designed as a complete maintenance feed for rabbits. The diet is characterized by a higher crude fiber content resulting in a lower energy density. The crude fibre content will support the chewing activity and the physiological gut function. Dietary composition: Alfalfa meal, wheat and wheat products, barley, sunflower meal, corn gluten feed, soybean meal, oat bran, sugar beet pulp, molasses, minerals, vitamins and trace elements, soybean oil, L-lysine HCl, DL-methionine.

Ssniff Guinea Pig Breeding Diet

Available in DENMARK, SWEDEN, NORWAY, FINLAND

10 kg bag. 78 bags per pallet. 4 mm pellets.

This diet has been designed as a complete feed for breeding of guinea pigs. The protein and quality as well as the energy density are adjusted to the high requirements during this stage of life. Dietary composition: Alfalfa meal, wheat and wheat products, barley, soybean meal, sunflower meal, corn gluten feed, sugar beet pulp, minerals, vitamins and trace elements, soybean oil, stabilized vitamin C, L-lysine HCl, DL-methionine.

Ssniff Guinea Pig Maintenance Diet

Available in DENMARK, SWEDEN, NORWAY, FINLAND

10 kg bag. 78 bags per pallet. 4 mm pellets.

This diet has been designed as a complete maintenance feed for guinea pigs. The protein content and the energy density are therefore lower than in the breeding diet to prevent obesity and oversupply in the adult guinea pig. Dietary composition: Alfalfa meal, wheat and wheat products, barley, soybean meal, sunflower meal, corn gluten feed, sugar beet pulp, minerals, vitamins and trace elements, soybean oil, stabilized vitamin C, L-lysine HCl, DL-methionine.

Ssniff Minipig Energy Reduced Diet

Available in DENMARK, SWEDEN, NORWAY, FINLAND

10 kg bag. 78 bags per pallet. 4 mm pellets.

Complete feed for minipigs. The energy density of this diet has been reduced to prevent obesity of the minipigs, particularly of adult female or inactive animals. The diet is therefore ideally composed for the maintenance of minipigs and long-term experiments. Dietary composition: Barley, wheat and wheat products, sunflower meal, alfalfa, sugar beet pulp, oat bran, minerals, molasses, corn gluten, brewer's yeast, vitamins and trace element premix, soybean oil, L-lysine HCl.

Ssniff Minipig Maintenance Diet

Available in DENMARK, SWEDEN, NORWAY, FINLAND

10 kg bag. 78 bags per pallet. 4 mm pellets.

This diet has been designed for the maintenance of adult and pre-adult minipigs. The diet is therefore characterized by a low energy density and medium high protein contents, however with good protein quality (amino acid composition). Dietary composition: Barley, wheat and wheat products, soybean products, corn products, sugar beet pulp, alfalfa, oat bran, minerals, brewer's yeast, vitamins and trace element premix, L-lysine HCl, DL-methionine, L-threonine.

Ssniff Primate, vegetarian, ex. fruits Diet

Available in DENMARK, SWEDEN, NORWAY, FINLAND

10 kg bag. 50 bags per pallet. Extrudate pellets.

Complete feed for non-human primates (NHP). This diet has been designed for the maintenance of pre-adult and adult primates. It is suitable for long term experiments (e.g chronic toxicity). The food contains oligosaccharides, which support the beneficial gut flora. Dietary composition: Oat middlings and bran, soybean products, corn products, rice, wheat, banana meal, apple pomace, sugar beet pulp, soybean oil, carob pods, potato protein, minerals, brewer's yeast, vitamins & trace elements, stabilized vitamin C, L-lysine HCl, DH-methionine, flavours.

Ssniff Rat/Mouse Maintenance Irradiated

Available in DENMARK, SWEDEN, NORWAY, FINLAND

10 kg bag. 78 bags per pallet. Irradiated 10 mm pellets.

Complete feed for mice and rats. This diet has been designed for rat and mice and is suitable for long term experiments (e.g. chronic toxicity studies), because of the moderate energy density and the very low nitrosamine contents. The diet is vitamin and amino acid fortified to compensate for the nutrient losses during the sterilization process. Dietary composition: Wheat and wheat products, soybean products, barley, minerals, oat hulls, sugar beet pulp, vitamins & trace elements, L-lysine HCl, DH-methionine.

DIETS STANDARD

Ssniff Rat/Mouse Maintenance Low Phytoestrogen Irradiated

Available in DENMARK, SWEDEN, NORWAY, FINLAND

10 kg bag. 78 bags per pallet. 10 mm irradiated pellets.

Complete feed for mice and rats. Without soybean and alfalfa products.

This maintenance diet for rats and mice contains no soybean or alfalfa products and contains accordingly only traces of the of the phytoestrogens genistein, daidzein and coumestrol. This diet is therefore suitable for studies on the effect of estrogens and similar substances (endogen disrupters).

Dietary composition: Wheat and wheat products, barley, corn gluten, potato protein, minerals, oat hulls, vitamins & trace elements, vegetable oil, L-lysine HCl, DH-methionine.

Ssniff Mouse Breeding Diet Irradiated

Available in DENMARK, SWEDEN, NORWAY, FINLAND

10 kg bag. 78 bags per pallet. Irradiated 10 mm pellets.

Complete feed for mice and rats. This diet has been designed for breeding of mice; it can also be used for rats. The dietary nutrient contents and the energy density are adjusted to the high performance during reproduction to meet the increased nutrient requirements. The diet is fortified for sterilization processes. Dietary composition: Wheat and wheat products, soybean products, corn (maize), minerals, soybean oil, brewer's yeast, vitamins & trace elements, L-lysine HCl, DH-methionine.

Ssniff Mouse Breeding Low Phytoestrogen Irradiated

Available in DENMARK, SWEDEN, NORWAY, FINLAND

10 kg paper plus PE bag. 78 bags per pallet. Irradiated 10 mm pellets.

Complete feed for mice and rats. Without soybean and alfalfa products. Designed for breeding of mice (it can also be used for rats), and is therefore characterized by high protein and energy contents. The feed contains no soyabean or alfalfa products resulting in very low concentrations (traces) of the phytoestrogens genistein, daidzein and coumestrol which make this diet suitable for studies on the effect of oestrogens and similar substances (endogen disrupters). Dietary composition: Wheat and wheat products, barley, corn gluten, sunflower meal, potato protein, minerals, brewer's yeast, vitamins & trace elements, vegetable oil, L-lysine HCl, DH-methionine.

Ssniff Mouse Breeding Low Phytoestrogen Autoclavable

Available in DENMARK, SWEDEN, NORWAY, FINLAND

10 kg bag. 78 bags per pallet. Autoclavable 10 mm pellets.

Complete feed for mice and rats. Without soybean and alfalfa products.

Designed for breeding of mice (it can also be used for rats), and is therefore characterized by high protein and energy contents. The feed contains no soyabean or alfalfa products resulting in very low concentrations (traces) of the phytoestrogens genistein, daidzein and coumestrol which make this diet suitable for studies on the effect of oestrogens and similar substances (endogen disrupters). Dietary composition. Wheat and wheat products, barley, corn gluten, sunflower meal, potato protein, minerals, brewer's yeast, vitamins & trade elements, vegetable oil, L-lysine HCl, DH-methionine.

Ssniff Rat/Mouse Maintenance Low Phytoestrogen Autoclavable

Available in DENMARK, SWEDEN, NORWAY, FINLAND

10 kg bag. 78 bags per pallet. 10 mm autoclavable pellets.

Complete feed for mice and rats. Without soybean and alfalfa products.

This maintenance diet for rats and mice contains no soybean or alfalfa products and contains accordingly only traces of the of the phytoestrogens genistein, daidzein and coumestrol. This diet is therefore suitable for studies on the effect of estrogens and similar substances (endogen disrupters).

Dietary composition: Wheat and wheat products, barley, corn gluten, potato protein, minerals, oat hulls, vitamins & trace elements, vegetable oil, L-lysine HCl, DH-methionine.

DIETS PURIFIED

Ssniff DIO 10 kJ% fat, 33% sucrose

Available in DENMARK, SWEDEN, NORWAY, FINLAND

12.5 kg box.

This purified diet of the DIO series is one of three control diets with low fat and energy contents. The sucrose content however, is high which may result in increased feed/energy/intakes particularly in rats.

Ssniff DIO 10 kJ% fat, no sucrose

Available in DENMARK, SWEDEN, NORWAY, FINLAND

12.5 kg box.

This purified diet of the DIO series is one of three control diets with low fat and energy contents. The sucrose content of this diet has been further reduced 1% in total.

Ssniff Primate, vegetarian, ex. fruits Diet

Available in DENMARK, SWEDEN, NORWAY, FINLAND

12.5 kg box.

This purified diet of the DIO series is characterized by high fat contents (lard) and high sucrose levels. It is therefore used to induce obesity and metabolic syndrome/diabetes (NIDDM) in rats and mice. The diet is also available with beef tallow as fat source (more saturated FA).

Ssniff Irradiated Rat/Mouse Maintenance

Available in DENMARK, SWEDEN, NORWAY, FINLAND

12.5 kg box.

This purified diet of the DIO series is characterized by very high fat contents (lard). It is therefore used to induce obesity and metabolic syndrome/diabetes (NIDDM) in mice. The diet is also available with beef tallow as fat source (more saturated FA).

Ssniff Clear H₂O HydroGel

Available in DENMARK, SWEDEN, NORWAY, FINLAND

56 g cup (96/box) or 170 g pouch (70/box).

Non-wetting water gel for animal hydration, 98% pure water. The industry standard for hydration during transportation. Delivering solutions: Suitable for short or long transit shipping times, supplement for compromised, recovering or weaning animals, alternative to water bottles and excellent emergency water source, useful in transitioning animals to automated watering systems. Delivering quality: Sterile inside and out, Tyvek® medical packaging, E-Beam irradiation, complies with quality standards as tested by an independent laboratory, certificate of analysis by manufactured lot. Individually coded with lot and date of expiration. Ingredients: Purified Water, Hydrocolloids, Electrolyte Blend, Food Acids.

**Ssniff Clear H₂O DietGel Recovery**

Available in DENMARK, SWEDEN, NORWAY, FINLAND

Available in 56 gram cups (96/box) and 170 gram pouch (70/box).

Flavor enhanced nutritionally fortified water gel including all six essential electrolytes that aids in the recovery of post surgical, weak or impaired rodents. Proven to increase survival rates in compromised animals. Formulated with purified ingredients that provides over 70% water, calories and electrolytes. Delivering solutions: Hydrates, replenishes, supports recovery, increases pup survival rates, increases post-surgical survival rate, reduces time and labor, aids in overall health during long-term shipping. Delivering quality: Sterile inside and out, Tyvek® medical packaging, E-Beam irradiated, purified ingredients exclude phytoestrogens and nitrosamines, complies with quality standards as tested by an independent laboratory, certificate of analysis by manufactured lot. Individually coded with lot and date of expiration. Instructions: To be administered under the direction of a veterinarian. Manufactured for use in research animals. Ingredients: Purified Water, Cane Sugar, Corn Syrup, Molasses, Vegetable Oil, Hydrocolloids, Plant Protein (Wheat), Electrolyte Blend, Food Acids, Mineral Mix.

**Ssniff Clear H₂O DietGel Boost**

Available in DENMARK, SWEDEN, NORWAY, FINLAND

56 gram cup (96/box).

High-energy nutritional supplement that provides caloric support for weanlings, post surgical, debilitated and aging animals. Delivering solutions: Increases pup survival rates, provides supplemental caloric and nutritional intake, great taste promotes consumption, provides extra energy to aid in recovery, easily digested soft texture, suitable for oral gavage. Delivering quality: Tyvek® medical packaging, E-Beam irradiation, purified ingredients exclude phytoestrogens and nitrosamines, complies with quality standards as tested by an independent laboratory, certificate of analysis by manufactured lot, individually coded with lot and date of expiration. Ingredients: Peanut Butter, Molasses, Corn Syrup, Purified Water, Pumpkin, Emulsifier, Food Acids, Vitamin Mix, Corn Fiber, Electrolyte Mix, Hydrocolloids.

DIET GEL

Ssniff Clear H₂O DietGel Criticare

Available in DENMARK, SWEDEN, NORWAY, FINLAND

112 gram cup (72/box). Not in stock. Delivery time 2-3 month.

Formulated with Timothy Hay, is a nutritionally fortified supplement for herbivores that are unwilling to eat their normal diet, due to illness, surgery or malnutrition. Rabbits and guinea pigs can be picky eaters. Our DietGel® Criticare is formulated with all the ingredients they love: timothy hay, pineapple and pumpkin! Remove the gel from the cup and offer to the animals in their regular feeding bowl, as is, mashed or cubed. Some animals also prefer the gel cold! Place in the fridge a few hours before serving. Delivering solutions: Suited for rabbits and guinea pigs. Flavorful soft gel formulation promotes consumption. Improves proper gut health and digestion, and aides recovery. Ready to use – no mixing required. Delivering quality: Sterile inside and out, Tyvek® medical packaging, E-Beam irradiation, purified ingredients exclude phytoestrogens and nitrosamines, complies with quality standards as tested by an independent laboratory, certificate of analysis by manufactured lot, individually coded with lot and date of expiration. Ingredients: Purified Water, Fruit Juice Concentrates, Plant Protein (Soybean), Pumpkin, Timothy Hay, Cellulose, Mineral Mix, Vegetable Oil, Food Acids, Hydrocolloids, Vitamin Mix.

Ssniff Clear H₂O DietGel 31M

Available in DENMARK, SWEDEN, NORWAY, FINLAND

56 gram cup (96/box)

Nutritionally fortified dietary supplement, combining hydration and nutrition in a single serving. Modeled after the NIH 31 Modified formula and made with purified ingredients, including sunflower seeds. The soft texture is ideal for compromised animals. Delivering solutions: Combines hydration and balanced nutrition, models NIH 31M nutrient profile for long term feeding, purified ingredients provide consistent nutrition, soft gel promotes consumption by compromised animals, including EAE, aging, neurological, surgical, cancer and immunodeficient models, sunflower seeds provide nutrition and enrichment. Delivering quality: Sterile inside and out, Tyvek® medical packaging, E-Beam irradiation, purified ingredients exclude phytoestrogens and nitrosamines, complies with quality standards as tested by an independent laboratory, certificate of analysis by manufactured lot Individually coded with lot and date of expiration. Ingredients: Purified Water, Molasses, Pumpkin, Corn Syrup, Sunflower Seeds, Plant Protein (Wheat), Vegetable Oil, Hydrocolloids, Food Acids, Mineral Mix, Electrolyte Blend, Corn Fiber, Vitamin Mix.

Ssniff Clear H₂O DietGel 76A

Available in DENMARK, SWEDEN, NORWAY, FINLAND

56 gram cup (96/box).

Nutritionally fortified dietary supplement, combining hydration and nutrition in a single serving. Formulated with purified ingredients, modeled on the AIN 76A maintenance diet formulation. It is flavor enhanced resulting in increased consumption. Delivering solutions: Increases pup survival rates, superior alternative to mash diets, designed to retain moisture, reduces time and labor, reduces potential for contamination, recommended for cancer studies, breeder support, pup maintenance, post-op recovery and post irradiation. Delivering quality: Sterile inside and out, Tyvek® medical packaging, E-Beam irradiation, purified ingredients exclude phytoestrogens and nitrosamines, complies with quality standards as tested by an independent laboratory, certificate of analysis by manufactured lot, individually coded with lot and date of expiration. Ingredients: Purified Water, Molasses, Corn Syrup, Cane Sugar, Plant Protein (Wheat), Vegetable Oil, Mineral Mix, Hydrocolloids, Food Acids, Vitamin Mix, Corn Fiber, L-Methionine.

**Ssniff Clear H₂O MediGel Sucralose**

Available in DENMARK, SWEDEN, NORWAY, FINLAND

56 g cup (96/box).

MediGel Sucralose is a Barrier Packed non-wetting sucralose flavored, low calorie water gel designed to administer medication to your research animal. The sweetener masks medication taste, like a spoon full of sugar! Delivering quality: Sterile inside and out, Tyvek® medical packaging, E-Beam irradiation, complies with quality standards as tested by an independent laboratory, certificate of analysis by manufactured lot, individually coded with lot and date of expiration. Ingredients: Purified Water, Hydrocolloids, Food Acids, Natural Flavor, Electrolyte Blend, Sucralose.
