

# FLEXIBLE RACK

## Stainless steel

**This rack offers optimal flexibility.**

**If occasionally you need more height in the rack, one or more plastic grid shelves can easily be removed and consequently this allows the use of larger cages.**

# FLEXIBLE RACK

## Stainless steel

### PRODUCT CODE

07-FLEX-RS-30 (5 shelves)

### MATERIALS

The rack is made in fully welded stainless steel square profiles (30 x 15 mm).

The plastic grid shelves are made in reinforced Polypropylene plastic.

Grid spacing: 66 x 40 mm.

4 non-autoclavable wheels (Ø125 mm), 2 with brake.

### SPECIFICATIONS

The plastic grid shelves are mounted in the rack with specially designed rubber suspension fittings, which absorb expansion during autoclaving as well as reduce noise and vibration.

Shelf distance: 300 mm.

Sloping roof.

### CAPACITY (examples)

15 European standard cages type 1354G (IV)  
20 European standard cages type 1290D (III)  
25 European standard cages type 1284L (II-L)  
25 European standard cages type 1264C (II) or  
50 if placed in double row

### DIMENSIONS

W 1274 x D 588 x H 1925 mm.

### WASHING / CLEANING

The rack is washable at up to 75°C and short-term rinse (max. 1 minute) at up to 90°C.

The rack including shelves, if equipped with autoclavable wheels, is autoclavable at up to 121°C.

The sloping roof drains water off.
